SKILLS

LANGUAGES

C C++ C# Python Dart SQL
Java Assembly JavaScript/TypeScript

FRAMEWORKS & TOOLS

React Flutter .NET FastAPI
Docker Git Gerrit CI/CD MQTT
Cap'n Proto GDB Jira SQL

SYSTEMS

Linux Linux Kernel Embedded Linux
Android (AOSP) Yocto Project
BitBake Zephyr RTOS USB-C / USB PD
Bash/Shell Scripting Thread Network

HARDWARE

PCB Design ARM Cortex-M SPI I2C
UART Computer Aided Design (CAD)

EDUCATION

Wichita State University

B.S. Computer Engineering | 05/2026

Minor: Computer Science

GPA: 3.9

- Cohen Honors College
- Elected President of Men's Soccer Club
- Freshman Leadership Council
- Senior Design Award Winner

Maize South High School

High School Diploma | 05/2022

GPA: 4.2 | ACT: 32

- Elected Captain of Soccer & Tennis
- Elected Student Government Rep.
- National Honors Society

SUMMARY

Software Engineer with hands-on experience developing embedded Linux, Android (AOSP), and firmware systems in high-autonomy environments. Proficient across embedded, desktop, and web platforms with a strong foundation in networked systems and hardware-software integration. Currently developing embedded Linux and Android firmware for commercial aviation display systems at Rosen Aviation. Holds a B.S. in Computer Engineering with a minor in Computer Science from Wichita State University. An ambitious, extremely fast learner who thrives on taking ownership of difficult problems and is driven to grow quickly and make a lasting impact.

EXPERIENCE

Rosen Aviation – Remote from MC2 (sister company)

06/2025 – Present

Software Engineer

- Build and maintain embedded Linux and Android firmware powering commercial aviation display systems, using the Android Open Source Project (AOSP) and the Yocto Project
- Build, customize, and maintain Linux and Android OS images across multiple hardware platforms
- Develop internal engineering, production, and testing tools using C#, Python, and .NET
- Diagnose and resolve production, repair, and customer issues spanning firmware, software, and hardware components

Mid Continent Controls (MC2) – Derby, KS

05/2023 – 08/2025 · 40 hrs/week (between semesters)

Software Engineering Intern

- Designed and developed software for embedded and networked systems, working across Linux, embedded Linux, and RTOS environments with an emphasis on reliability and performance
- Built and maintained CI/CD pipelines and containerized development environments, improving team deployment workflows
- Independently conceived, designed, and shipped a production mobile application in Flutter and a full front-end web interface in React
- Contributed to hardware development through PCB design, electronics assembly, soldering, and schematic comprehension

Spirit AeroSystems – Wichita, KS

Summer 2022 · 40 hrs/week

Manufacturing Engineering Intern

- Shadowed engineers throughout the aircraft manufacturing lifecycle, gaining exposure from component fabrication through final assembly
- Developed a broad understanding of aerospace manufacturing workflows, systems integration, and large-scale industrial engineering operations across cross-functional teams
